Bug-a-Bug Hypo-Allergenic Insect Repellent

200ml

No synthetics
No artificial fragrances
No artificial colouring
No eye irritation
No skin irritation
No buzzzzzzzzzz

What it is:

Unique Australian indigenous oils combined with wild harvested organically certified Andiroba Oil and our pure carrier oil blend to hydrate and nourish—a soothing elixir—helps to protect from annoying insects while infusing skin with visible radiance.

The Andiroba tree grows in the extensive Amazon region along the banks of rivers. The Native families wild harvest the nuts as they fall into the river and float downstream. They pile these nuts in an open space to let them ferment, allowing the shell to break, and the oil to be drained from the pulp in a primitive press.

They have used this oil for thousands of years for the treatment of skin and muscular inflammations, and as a repellent against insect bites.

- Delivers nourishing, moisturising insect repellent.
- No eye or skin irritation, even after continuous daily use.
- Protects with natural anti-oxidants and plant hydrating essences.

What it does:

Bug-a-Bug's essential oils have a highly effective repellent action against biting insects and does not contain synthetic pesticides. It is uniquely different in its action to traditional scented insect repellents and works with young skin's own biology. It's pure essences are uniquely aligned to the skin's natural chemistry and are highly suitable for continuous prolonged daily use.

How to use it:

Shake well before use. Apply *Bug-a-Bug* liberally and evenly before exposure to insects. For face, dispense into hands and then spread on face and neck. For continued effectiveness, reapply every two hours to maintain repellancy.

When to use it:

- It is suitable for continuous everyday use on children of any age without any irritation or toxicity from constant re-application.

Is recommended for:

- normal, oily or dry skin;
- maximum assistance in repelling insects; and
- daily use during warmer weather when insects are more prevalent.

Features:

- Artificial preservative, artificial fragrance and artificial colouring free.
- >99% plant derived, organically certified and/or wild harvested ingredients.
- Readily biodegradable.
- Natural plant oils moisturize and soothe the skin.
- Waterway friendly.
- Greatly assists in repelling insects.
- No eye irritation.
- No skin irritation.
- Ingredients tested and proved to be a natural insect repellent.

Key flower & plant ingredients:

- Certified organic Andiroba Oil combined with certified organic Vanilla Oil, and Soya Bean Oil present an effective natural deterrent to insects.
- Aromas of uniquely Australian indigenous essential oils blended with traditional ancient essences relax and soothe.
- A blend of Australian essential oils (Rosalina Oil, Broadleaf Paperbark Gum Oil, Lemon-scented Iron Bark Oil) provide primary fragrant notes and add moisture sheen and luster to the skin.
